Truth in Savings disclosures

Except as specifically described, the following disclosures apply to all of the accounts:

- Rate.** The dividend rate and annual percentage yield on your accounts are set forth above. For interest-bearing accounts, the interest rate and annual percentage yield may change monthly as determined by the Credit Union Board of Directors.
- Nature of dividends.** Dividends are paid from current income and available earnings after required transfers to reserves at the end of a dividend period. The dividend rate and annual percentage yield set forth above are accurate as of the effective date that the Credit Union anticipates paying for the applicable dividend period.
- Compounding and crediting.** Dividends and interest will be compounded and credited as set forth above. The dividend period for all dividend bearing accounts begins on the first calendar day of the dividend period and ends on the last calendar day of the dividend period as set forth above.
- Accrual of dividends/interest.** Dividends and interest will begin to accrue on non-cash deposits (e.g. checks) on the business day you make the deposit to your account. If an account is closed, interest accrued will be credited to the account and included in the closeout balance.
- Balance information.** The minimum balance required to open each account is set forth above. For money market and money market accounts, the minimum balance required to obtain the stated annual percentage yield is set forth above. If the minimum balance is not met, you will not earn the stated annual percentage yield. For checking accounts, the minimum balance required to avoid a service fee is set forth above. For all dividend/interest-bearing accounts, dividends/interest is calculated by the daily balance method that applies a daily periodic rate to the principal in the account each day.
